

Ireka unit gets Urban DNA contract

KUALA LUMPUR: Ireka Corp Bhd's unit, Ireka Engineering & Construction Sdn Bhd, has received a contract worth RM249.50 million from Urban DNA Sdn Bhd for the construction of superstructures for serviced residences and a hotel. In a filing to Bursa Malaysia yesterday, it said the works involved a block of serviced residences (200 units) and a 40-storey hotel (253 rooms) comprising a six-storey podium and a three-storey basement car-park. "The company does not foresee any exceptional risks other than normal operational risks associated with the contract," it said.
