Safehouse to drive i-Tech revenue

KUALA LUMPUR: i-Tech Network Solutions Sdn Bhd (i-Tech), the technologies arm of Ireka Corporation Bhd, has set a target revenue of about RM500,000 this year from the launch of its green data centre Safehouse – which offers managed services, disaster recovery and business continuity solutions and co-location services. "We are very confident of achieving this revenue target as we have already got the support from 10 clients in the area of hospitals, the media, healthcare, IT companies and government agencies in phase one of the initiative," said chief executive officer Leonard Yee. "Recognising the potential of data centres in economic development, the Entry Point Project 3 (EPP3), aims to position Malaysia as a world class data centre hub. Safehouse, albeit a relatively small player, has huge potential and project solutions for small and medium enterprise." — Bernama
