SAFEHOUSE

EXCEEDING YOUR EXPECTATIONS

Having your servers and data secured in a high-end facility is not enough these days. With technology expanding at an exponential rate by the day, you not only need a data centre to store your data, you need professional people who can help you and understand your business needs.

SAFEHOUSE offers you these and a lot more. SAFEHOUSE is a 'boutique' and 'green' data centre with 5,000 sq ft of data centre space and features state-of-the-art facilities providing you with peace of mind 24/7.

SAFEHOUSE not only boasts a highly efficient and highly scalable data centre but also offers convenience and service beyond comparison.

We are an agile data centre delivering high availability and low total cost of ownership

made possible by integrating racks, power, security and cooling via a modular data centre architecture.

At SAFEHOUSE, our engineers and IT professionals are not only able to handle your support calls, but also provides you with advice to help ensure your business operations run smoothly, thereby maximizing your ICT assets. We provide an integrated end-to-end service from procurement of your servers to managing a single service of your application.

SAFEHOUSE is managed by i-Tech Networks Solutions Sdn Bhd which is a wholly-owned subsidiary of Bursa Malaysia Main-board listed Ireka Corporation Berhad.
